

Additional Questions Post-Investor Update Conference Call

Q: Could you please clear this up for me?

“Assuming a successful inspection and evaluation, the aircraft will be acquired utilizing TMPS common shares. TAS expects to issue to the Seller approximately 6,730,769 shares at a value of \$0.52 per share.”

Does this mean Tempus will be issuing approximately \$3.5 million worth of shares, and the \$0.52 was an estimate value per share at the time of the press release? Would these shares be restricted or immediately available for sale on the market?

A: \$3.5 million of shares priced at \$0.52 will be issued upon closing.

Q: How soon will we hear anything about the planes and whether they passed inspection and will in fact be finalized? In addition, if they pass the inspection, I believe the shares are restricted for 6 months, correct?

A: The first phase of the inspection was completed on Friday, 29 September 2017. The second and final phase should be completed prior to 13 October 2017. The first phase was primarily a physical inspection and the second phase is primarily records and paperwork.

Q: What is the status of getting a new Board of Directors?

A: The current plan is a re-constitution of the Board of Directors during the 1st quarter of 2018.

###

Thank you everyone for your questions and your participation in the investor update call. We look forward to continuing to provide an open line of communication. Please feel free to email comments, questions and/or concerns to kterry@tempus-as.com or Direct Message us through Twitter at @TempusAS or Facebook at www.facebook.com/TempusAppliedSolutions. Talk with you next quarter! – Team TAS
